WORK EXPERIENCE

Erasmus intern at Smart Monshi Oy start-up Helsinki March/June 2024

Web analysis and development of the Helsinki Blockchain Center website and LinkedIn page, development of apps on Telegram that leverage the TON blockchain, creation and launch of meme tokens within the TON blockchain, creation and management of various websites with Wordpress, creation of a virtual gallery auction in the metaverse for a no-profit campaign.

Intern in the editorial office of the municipality in Pordenone June/August 2023

Management of the municipality of Pordenone's Instagram and Facebook social pages, insertion of summer events within the website and data analysis with reporting of the same website through the Web Analytics platform.

Electromechanical Maintainer Camolli July 2019/September 2022

Electromechanical maintainer of coffee machines for bars and management of warehouse and shipments.

SOME PROJECTS

Siderall Art For Life

Art gallery in the Spatial.io metaverse with an exhibition and an auction of digital art and NFTs for charity. Half of the proceeds went to Medicines Sans Frontiers. My role was leading the relationships with partners Hug Platform, Ruby Fever and Medicines Sans Frontiers as humanitarian org. I also helped with the website development and pushed the project in the social media pages. We achieved our goal of submitting almost 100 digital arts made by artists from all Finland like Vesa Kivinen and sold almost all of them.

SisuCoin e TonSnipe

Two meme tokens created, launched, and marketed on the TON blockchain. My role was to create the websites and help with the community building in Telegram.
